About This Game

Garbage Day is an open world sandbox game, in which you are stuck in a time loop (meaning you live the same day over and over).

In this game you have to explore and interact to find out how to get out of the time loop. You are open to do anything you want, kill innocent people, go to work, watch tv, go to the park, etc.

There is no surprise that this game is inspired by the movie Groundhog Day.

The game takes place in a regular suburban town, powered by a nuclear plant, but after an accident in the power plant you get stuck in a temporal loop.

Your main goal is to find a way to break the time loop by exploring the world and to find out the secret behind all of this. If you die, you just wake up in your bed and the day starts again, so the world is your oyster.

When you wake up you still know the information from the previous day and this influences the dialogue choices. Be a ruthless killer or become the friendliest neighbor to have ever walked the earth. Nothing matters when you're stuck in the same day for eternity... But maybe there's a way out.

Title: Garbage Day
Genre: Action, Indie, Early Access
Developer:
Svajūnas Žemaitis
Publisher:
Svajūnas Žemaitis
Release Date: 18 Jan, 2016

a09c17d780

Processor: 2.4GHz Dual Core

Memory: 4 GB RAM

Graphics: 512 MB NVIDIA GeForce 9800 / ATI Radeon HD 2600 XT

DirectX: Version 10

Storage: 2 GB available space

English

Well I got the game with high hopes of seeing it develop but somewhere in 2017 updates stop coming out and nothing was said after that point. The game was fun to play for the first 35 minutes but then it gets bland cause it is the same thing over and over again, there is no goal or point to the game. I was hoping the campaign or little story mode thing would come out but like I stated before the developer completely abandoned this game. It was a complete waste of 15 dollars. My disappointment is immeasurable and my day is ruined. They said it would be in early access for about 6 months but it has been a full 3 years since release. Please save your 15 dollars and stay away from this game.. the dev is dead

. I am not sure if this dev is still working on this he said that is was probably gonna be updated in early 2018 but... its like pretty much mid year 2019. it is also kinda just plain you just do the same thing pretty much for every time you play. The price should really be toned down a notch especially if the developer does not even work on it feel bad for people who bought this for the VR experience and was ready it is not at all worth it. Please PLEASE PLEASE PLEASE i'm begging you to save that 15 dollars and go spend it on some food or a more worth it steam game maybe even invest in stocks just do not buy it. To put it in simple form: 0V1000. Garbage day is more of a garbage rip off that steals your 15 dollars and never gives it back until a refund.. THIS IS THE WORST GAME EVER.

the game was great BEFORE nut now IT'S CRAP.. Pretty sure the Dev is now under the name of Kiddy. Same types of game like this get released on a constant basis, so it's either him or someone just using his assets. Unless those games are his prototypes as he "works" on Garbage Day. Steam should remove this from the store and refund everyone who has it.

The game has been abandoned by the developer, don't waste your money.. Pls dont buy this game, its just a scam.. sucks\u2665\u2665\u2665\u2665\u2665\u2665you cant do anything izz boring. Kind of fun for the first 20 minutes but after that it gets pretty boring. The game was supposed to be updated in 2018 but it is now 2019 and still no update.. Devs gave up on the game.
